LAB 2

Agile Backlog Creation & Sprint Simulation in Jira

Vaccination Cohort & Dose Scheduling System

NAME:Arjav.Chandranath

PES2UG24CS080

Project	SCRUM
Jira Issues	SCRUM-7 through SCRUM-18
Epics	4
User Stories	8
Total Story Points	37

Final Deliverables

Backlog • Story Points • Sprint Board • Burndown Chart • Reflection

1. Jira Agile Backlog

The Jira backlog contains four Epics and eight User Stories. The screenshot below shows the eight stories (SCRUM-11 to SCRUM-18), their Epic relationships, workflow status, and story-point values. The displayed story points total 37.

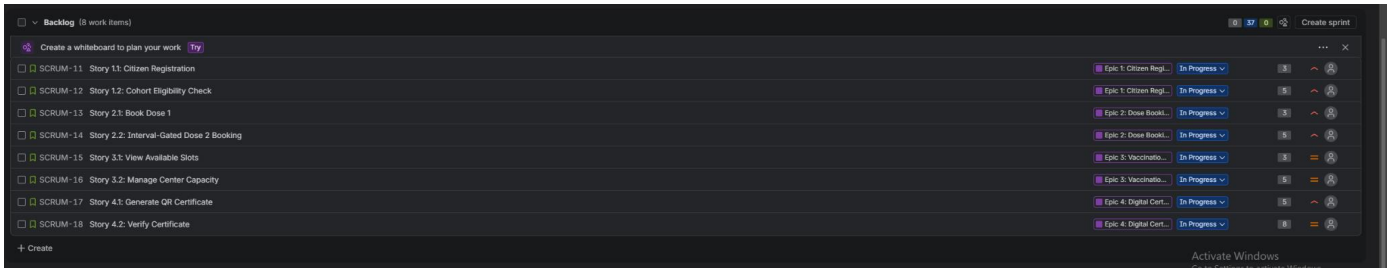

Figure 1. Jira backlog showing the eight User Stories and story-point values.

Backlog Summary

Key	User Story	Epic	Priority	Story Points
SCRUM-11	Story 1.1: Citizen Registration	Epic 1	High	3
SCRUM-12	Story 1.2: Cohort Eligibility Check	Epic 1	High	5
SCRUM-13	Story 2.1: Book Dose 1	Epic 2	High	3
SCRUM-14	Story 2.2: Interval-Gated Dose 2 Booking	Epic 2	High	5
SCRUM-15	Story 3.1: View Available Slots	Epic 3	Medium	3
SCRUM-16	Story 3.2: Manage Center Capacity	Epic 3	Medium	5
SCRUM-17	Story 4.1: Generate QR Certificate	Epic 4	High	5
SCRUM-18	Story 4.2: Verify Certificate	Epic 4	Medium	8
	TOTAL			**37**

2. Story Point Assignments

The story points are assigned to the eight User Stories using the Fibonacci-style values shown in Jira. The total planned effort is 37 story points.

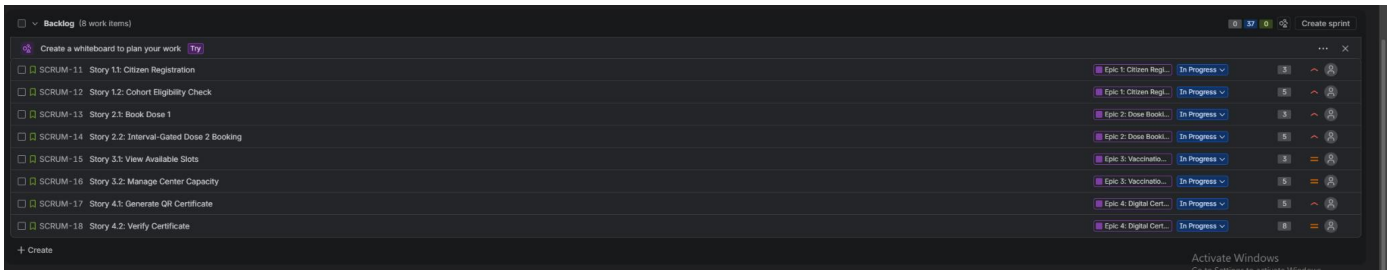

Figure 2. Jira evidence for story-point assignments.

Story-point total: 37

3. Sprint Simulation — Active Sprint Board

The sprint board screenshot records the simulated workflow of the User Stories across To Do, In Progress, In Review, and Done. This demonstrates movement of work through the Jira workflow during sprint execution.

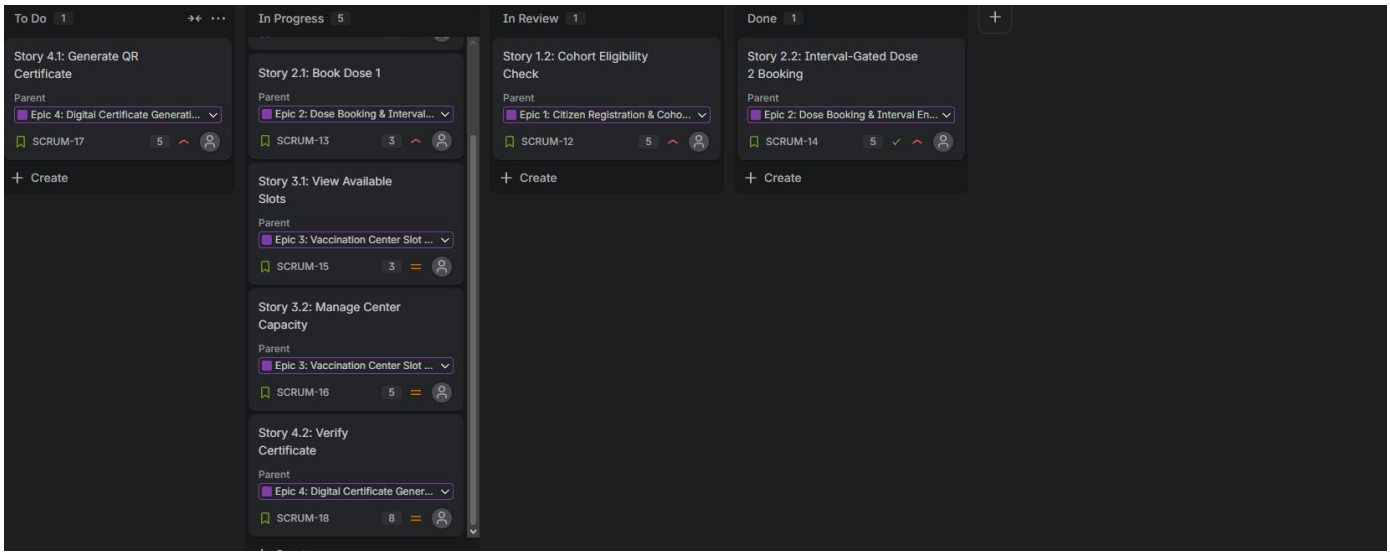

Figure 3. Jira sprint board showing work distributed across workflow states.

Sprint Execution Evidence

The board contains one story in To Do, five in In Progress, one in In Review, and one in Done at the time of capture. Story keys and story-point values are visible on the cards.

4. Burndown Chart

The Jira Sprint Burndown Chart uses Story Points as the estimation field. The captured chart corresponds to SCRUM Sprint 3 and shows the sprint period from August 25, 2026 to September 1, 2026, together with remaining work and the ideal burn-rate guideline.

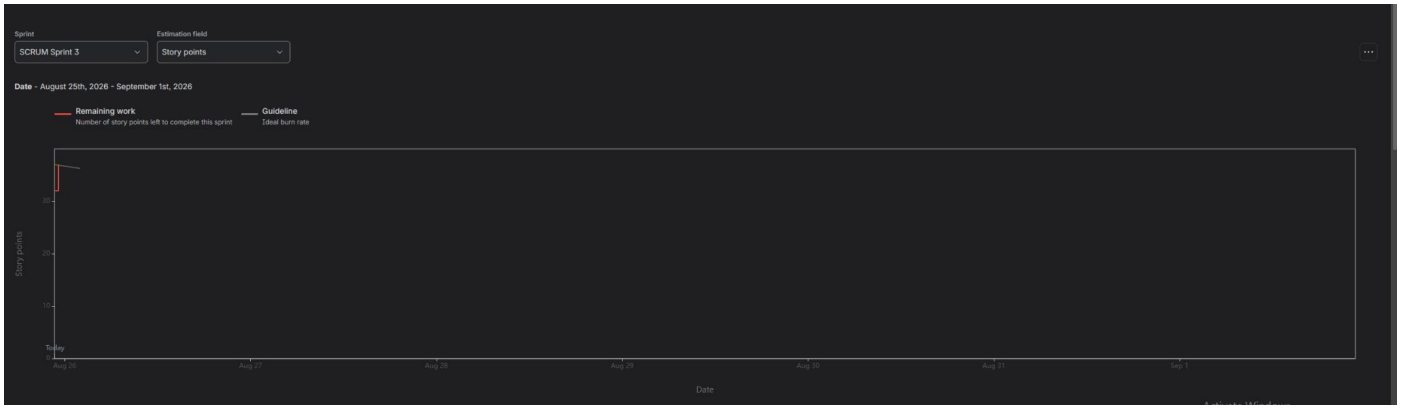

Figure 4. Jira Sprint Burndown Chart using Story Points.

Note: The chart was captured during the sprint, so the remaining-work line contains limited progress data. The screenshot is retained as the actual Jira report evidence rather than artificially modifying the chart.

5. Reflection

1. Did your estimations reflect the actual effort?

The estimates gave a reasonable indication of the relative effort of the stories. Smaller stories such as viewing available slots were assigned fewer points, while more complex stories such as certificate verification received higher estimates. The estimates also helped compare the amount of work planned for the sprint.

2. Was your backlog well-prioritized?

Yes. The higher-priority stories were mainly the core registration, eligibility, dose-booking, and certificate-generation functions. Medium-priority stories supported the core workflow, such as viewing slots, managing capacity, and certificate verification.

3. How did your simulated sprint align with your plan?

The sprint simulation followed the planned Agile workflow by moving stories through different Jira states. The board shows work distributed across To Do, In Progress, In Review, and Done, which made the progress of the sprint visible.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart provides a visual comparison between remaining work and the ideal burn rate. It helps identify whether the team is progressing at the expected rate and can be used to assess whether the remaining story points are realistic for the available sprint time.

6. Submission Checklist

☐ Jira backlog with 4 Epics and 8 User Stories — included

☐ Story point assignments — included; 37 points total

☐ Sprint Board / Active Sprint evidence — included

☐ Burndown Chart — included

☐ Reflection questions and answers — included
